ESSENTIAL BUSINESS BULLETIN - FOR IMMEDIATE RELEASE

Drive DeVilbiss Healthcare is a manufacturer, importer, and distributor of medical products that serve vulnerable populations worldwide. We are one of the nation's largest manufacturers of oxygen and other important respiratory and medical devices. Our products serve hospitals, long-term care facilities, Veterans' Administrations (VA), and individuals of all ages who have respiratory (breathing), mobility, and other health challenges. Accordingly, we are a business that is essential to the worldwide population on a daily basis, and especially essential during a public health crisis.

Drive DeVilbiss Healthcare has mobilized very limited members of its team to respond to the emergent need for our products during the worldwide COVID-19 crisis. We have prepared this communication and an associated letter for our employees to present, if necessary, to explain and justify their work-related travel during any applicable restrictions.

Drive DeVilbiss Healthcare is committed to keeping our employees and customers safe while meeting the needs of those we serve. As such, we have implemented stringent protocols, which help to combat and prevent community spread, while allowing us to continue as an essential business during this time.

For questions regarding this communication, please contact:

Dawn Rubel
Senior Vice President, Global Safety, Quality & Regulatory Compliance
